Patan's most Reputed British Education Provider

PROSPECTUS

“Patan’s Most Reputed British Education Provider”

Message from Vice-Chancellor University of Bedfordshire

As Vice Chancellor, I want to say thank you for considering the University of Bedfordshire for your studies.

We pride ourselves on being a global community where international students are truly welcome. Not only do we attract international students from all over the world, but staff members too, with over 120 countries represented in our staff and student body.

The University of Bedfordshire is the place to be if you want to grow not only academically, but socially too, with friendships built on our campuses often lasting a lifetime.

Our record of nurturing the talent of the future dates back more than 100 years, but that’s not to say we are stuck in the past! Based at a number of locations in and around Bedfordshire, United Kingdom, we are a modern and dynamic university with a strong track record of transforming the lives and career prospects of our students.

Our professional, experienced, efficient, and caring staff in the International Office are always ready and willing to help and support you from your enquiry to your graduation and beyond!

I very much look forward to welcoming you to the University.

Pro. Rebecca Bunting

Vice-Chancellor

University of Bedfordshire

"Patan's Most Reputed British Education Provider"

Message from Chairman

Dear Enthusiastic Students,

On behalf of the entire college team, let me congratulate you on your new chapter in life and wish you the best of luck in your future endeavors.

Our college is committed and focused on providing high-quality education with the collaboration of the University of Bedfordshire, UK. We proudly announced that the student will have the ability to match the standard of the international level with practical knowledge through an accreditation degree. Alongside this, we have opted to create another significant landmark in the field of education within an international diaspora.

As you embark on this exciting journey with us, I encourage you to take advantage of all available resources and opportunities and strive for excellence in all that you do. Along with that, I anticipate making the most of your time in order to make your dreams a reality. Also, if you need any kind of help with your professional development, you can always reach out to me.

Er. Pankaj Jalan

Chairman

LBEF Group of Institutions

Message from Executive Director

Dear Aspiring Students,

At the outset, let me take this opportunity to introduce PCPS College and delve briefly on the requisite for its inception. The establishment of PCPS College is to provide the education that meets global standards and to execute our dreams we collaborate with the UK university in Nepal. We believe that acquiring the certificate is not enough on today's date, expertise is also a must for the self-marketing of the students in the global arena.

With this vision, we strive to provide our youth with the best preparation for careers and life after graduation. We strongly believe in the adage, “Education is for life, not just for a living,” and we strive to instill in our students a love of learning that will include the knowledge and understanding they will need to make a positive contribution to the communities in which they live and work. We are proud of our academic partnership with the University of Bedfordshire, which will guide and support us in this endeavor.

Finally, I'd like to welcome all aspiring students to PCPS. I'd like to invite you to participate in this intellectually stimulating and entertaining event.

Er. Prakash Kumar Kejriwal
Executive Director
LBEF Group of Institutions

About PCPS College

PCPS College is a multilingual, diverse, multicultural institution of higher education that ensures intellectual, research, and informed teaching. It is an integral part of the Lord Buddha Education Foundation (LBEF), Nepal's first IT organization founded in 1998. PCPS College offers International (UK) undergraduate and graduate programs in various fields of study, including Business, Hospitality Management, Information, and Technology with various opportunities to gain practical experience through internships, field visits, and project work.

Why choose PCPS College?

PCPS is situated in Kuponhole, Lalitpur district of Nepal, the most vibrant area known for its IT cluster and startup companies. With enrollment at the PCPS college, you will not only earn the degree or gain knowledge but you will have an idea to tackle the shortcomings of the practical world along with professional advancement by being a part of the global networks.

We think that each student's career aspirations should be realized. So as to make managing your finances easier, we will offer attractive scholarships.

It would be a significant decision that would impact your life to consider continuing your education at PCPS College. Joining us will provide you the opportunity to launch your goals in a collaborative and encouraging setting where you can land with ease.

Our Journey

The ambition to offer a degree from a prestigious UK university in our own backyard was the inspiration for the founding of PCPS College. This initial idea was given momentum by starting a very thorough investigation of universities in the United Kingdom (UK). The search was extensive, and laborious, but fruitful because it brought us to the University of Bedfordshire (UoB), a reputable UK institution of higher learning with over a century of experience.

Approval & Recognitions

We have been approved by the Ministry of Education, Nepal Government to run the courses from the University of Bedfordshire, UK. We have also received institutional recognition from Tribhuvan University, Nepal.

University of Bedfordshire

A modern, innovative university with a heritage of top-quality education going back more than 100 years. University has six colleges in Luton, Bedford, Aylesbury and Milton Keynes, with students from over 100 countries around the world. University of Bedfordshire works with academic partners both in the UK, and overseas, to deliver a range of courses from foundation degrees to doctorates. Apart from this, it is a college which is ranked between 251 - 300th in the young university rankings 2022. In this university you get the best of all worlds with our college locations in Luton, Bedford, Milton Keynes and Aylesbury. Colorful, culturally diverse towns with a long history and strong sense of community, big enough to offer a tempting choice of shops, sports and entertainment. Beautiful countryside, framed by the Chiltern Hills, is on your doorstep as well as villages perfect for a pub lunch.

“Patan’s Most Reputed British Education Provider”

Employable Programme

Our course designs are tailor-made to ensure that you get a head start in your career by providing you with a vast array of activities to develop your skills and experiences that can go a long way in shaping your career. During the course years, you will have ample opportunities to involve and indulge in employer events, careers guidance, mock interviews, internships, personality development programmes and more.

Obtain a Globally Recognized and Accredited Degree at Home

The degree provided at the end of the Undergraduate course is awarded by the University of Bedfordshire, one of the oldest and reputed Universities of the United Kingdom (UK). The recent trends in higher education, in the context of Nepal, indicates an increasing number of students pursuing a foreign degree in Universities abroad for the Undergraduate and Graduate levels. The programme delivered at PCPS provides the next best alternative for Nepalese students, who aspire to obtain a foreign degree, but do not have the financial means to go abroad for higher studies. They can avail a globally accredited degree at home.

Connect with Skilled & Experienced Professionals

We have connections with a sizeable number of companies, both national and international. We also periodically welcome international visitors to our College annually, to share their expertise and knowledge with you and provide you with real case studies to work on. We also provide the logistic support to our students for placements, something that can be of help to kick start your professional career.

"Patan's Most Reputed British Education Provider"

More than just a **DEGREE**

We believe that College life is about far more than just your studies and that is why we offer you more than a degree. To complement your studies, we offer a range of opportunities for you to develop as a professional.

Fosters Entrepreneurs / Entrepreneurship

Success in today’s world in career is not just about having the right knowledge and degree but also the right aptitude. Organizations and companies are increasingly on the look out for employees who can harness and demonstrate an entrepreneurial attitude. We aim to inculcate and develop the entrepreneurial attitude and ethos into our students and teach them how to market an idea, budget, network and prepare the business plans.

Preparation for the Real World

We value real-world experiences in order to prepare you for life beyond university, through our connections with a significant number of national and international organizations/companies. Through our Student Internship Scheme, you can gain that all important practical experience, whilst completing your course. In addition, the placement cell at the College will provide all logistic support to ensure that ideal placements are available for you, in line with your area of interest.

Critical Thinkers and Creative Spirits

The teaching you receive at PCPS is varied and comes in many forms; lectures, tutorials, group projects and workshops. You will be guided and mentored by some of the leading academics in their field, skilled at developing your critical thinking, analysis and communication skills.

Learning from Research

Research is an important value addition that enhances your learning experiences. Our education partner, University of Bedfordshire was awarded the prestigious Queen’s Anniversary Prize for Higher and Further Education in 2013 for the pioneering research work in the area of social work and care.

BBA

B.A(Hons) Business Administration

Qualification

BA (Hons.)

Awarding University

University of Bedfordshire (UoB), UK

Credits

360 Credits
(Total for three years)

Duration of Course

Three Years (Full time)

Course Title

Business Administration

This course is targeted towards achieving both practical skills and conceptual understanding required for administration and management functions within a host of organizations. It provides a broad understanding of the role and function of both management and administration under a range of operating conditions and as such builds for you a contextual and conceptual framework of the organization as it responds to ever changing conditions. All the basic functional areas that are deemed to comprise the business discipline – Marketing, Operations, Information Systems, Finance, HRM, Business Policy and Strategy and Change, Economics, Law and Contemporary Issues – are examined over the duration of the course and in the context of contemporary change.

The course aims to deliver conceptual propositions and skills related to:

- ➔ a range of business models, ideas and managerial techniques
- ➔ a number of management theories relevant to different functions of the business
- ➔ a range of suitable examples and contexts to assist you in operating in different business environments.
- ➔ the opportunity to expand upon theoretical constructs into the application of knowledge and its practical implications for the business as a going concern.

Distinctive Features

The course aims to develop to deliver the conceptual propositions and skills related to:

- Students are encouraged to plan and take part in intra-, inter-departmental seminars, and intercollegiate fests to develop their abilities and keep up with the most recent trends and developments in the field of management.
- To help students build corporate skills, guest lectures are provided through industrial contacts. Through these events, students in their BBA course gain further exposure to thought leadership and management abilities.
- To enable and pursue opportunities in the self-employment or entrepreneurial sector
- To make the students able to address the managing issues of the twenty-first century.
- To put an emphasis on the intellectual, analytical, and communication skills that will help students develop their personalities holistically.
- To cultivate in young people a positive mindset that would lead to excellent achievement and devoted commitment to society.

Career Opportunities

After acquiring the degree in the BBA (BA Hons), students are likely to progress on to the following areas:

- ➔ You will learn about the global issues that businesses confront by pursuing a BBA(BA Hons), such as international boundaries, various trading rules, and global economics. Additionally, students will discover how to negotiate across cultural differences and overcome these difficulties. Additionally, they will have the chance to meet with students from various nations during your course, providing them with an up-close and personal insight of how businesses operate in other nations.
- ➔ Furthermore, During the course, you will add the skills like leadership qualities, effective communication skills, problem solving, strategic thinking and decision making, which students could apply in positions like Information Systems Manager, Production Manager, Business Administration Professor, Finance Manager, Business Administration Researcher, Human Resource Manager, Management Accountant, Marketing Manager and Business Consultant.

BBA Course Structure

BSc (CS & SE)

BSc(Hons) Computer Science & Software Engineering

Qualification

BA (Hons.)

Awarding University

University of Bedfordshire (UoB), UK

Credits

360 Credits

(Total for three years)

Duration of Course

Three Years (Full time)

Course Title

Computer Science & Software Engineering

Computer Science is at the core of modern technology and at the heart of a number of specialist technology fields. This course is aimed at providing a foundation as well as a platform for specialist study in the second and third stages, during which you will learn in depth, the principles and practices of both disciplines computer science and software engineering.

The disciplines of Computer Science and Software Engineering are central to many of today's commercial and industrial activities, as well as providing a diverse and rapidly developing field for personal study. This course is designed to enable you to analyze and build a range of applications. Emphasis is on the entire software development life-

cycle, and the production of high-quality software systems using object-oriented (OO) methods and tools. You'll explore the entire systems development life-cycle, as well as comprehensively covering OO methods.

The final-stage project enables you to take your specialist work to greater depth, leading to the possibility of future research. The emphasis of the course is to provide vocationally skilled programmers and software engineers who have both a general overview of computer science and software engineering, with a more detailed knowledge of fields like Internet programming, database applications, artificial intelligence applications or networking.

Distinctive Features

This course is designed to develop graduates to enhance graduates who are able to:

The course has been designed to develop graduates who are able to:

- Broadly based yet enough depth (programming skills, testing skills etc.) so as to give you credible vocational skills in both Computer Science and Software Engineering;
- Coverage of the entire Software

Engineering life-cycle and comprehensive skills in applied programming and in applied Computer science topics;

- Taught by staff with both a strong academic research background who're also actively engaged in knowledge transfer (e.g. to local SME's), and who are at the forefront of their field;
- Emphasis on the life-cycle but also in depth skills such as programming and analysis.

Career Opportunities

- It is possible to identify several different roles that graduates of this course are expected to fulfill: competent software engineering technician, trainee computer programmer/software developer.
- Further study: *MSc IT, MSc in Software Engineering related topic.*

BSc (CS & SE) Course Structure

The Units which make up the course are:

MBA*

Master of Business Administration with Data Analytics

Qualification

MBA

Awarding University

University of Bedfordshire (UoB), UK

Duration of Course

Full-time over 24 months

Entry Month(s)

6 Intakes per year

(October, November, February, April, June, August)

**Proposed*

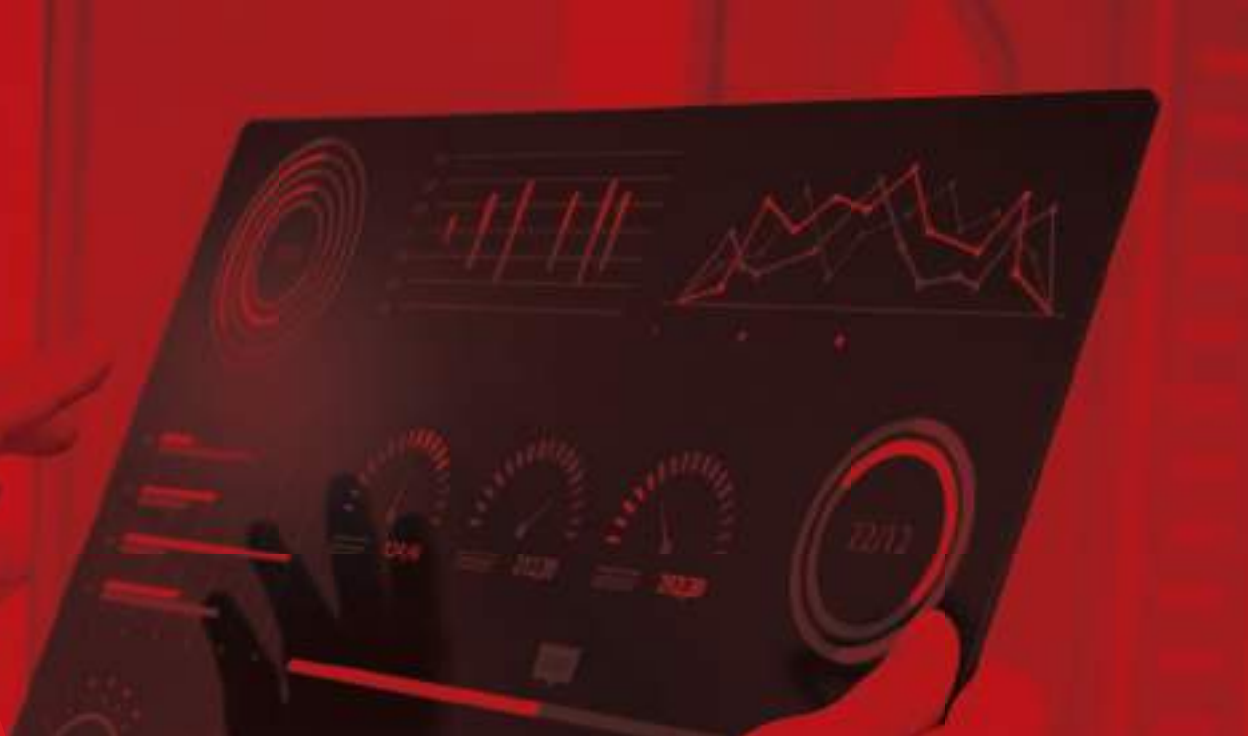

The course combines core MBA disciplines with innovative subject areas supported by the latest research in strategic management and leadership to develop business competence and strengthen confidence and credibility, providing you with the practical and theoretical capabilities to master the complexities of a competitive and changing business environment.

Data Analytics Units cover a wide range of topics, including programming, databases, security, project management, and computer networking, giving you both the underpinning theory and the ability to apply it to complex real-world problems, as well as an awareness of emerging technologies and developments.

The Data Analytics Units are designed for non-computing graduates who are looking to apply information technology to their careers or who are looking to change their career direction. These units cover a wide range of topics, including programming, databases, project management, and computer networks. During the units, you will learn the underpinning theory of these topics and apply these theories to practical scenarios

Distinctive Features

- ➔ Students are encouraged to plan and take part in intra-, inter-departmental seminars, and intercollegiate fests to develop their abilities and keep up with the most recent trends and developments in the field of management.
- ➔ Demonstrate a deep and systematic knowledge and understanding of the key principles, tools, and techniques in the field of applied computing and information technology aligned with advanced problem solving, innovation, and creativity to develop solutions to applied computing and information technology contexts.
- ➔ Acquire strong technical expertise and critical awareness of the security implications, methodologies, and frameworks applied to modern information security management systems to safeguard organizations and their assets.
- ➔ Flexibly and creatively apply knowledge to improve and modify existing incident response programs and demonstrate the ability to critique national and international standards and best practices.
- ➔ Critically identify and apply the professional skills and competencies needed in contemporary employment contexts, critically self-auditing relevant skills and competencies to create and manage a personal development plan addressing gaps and developing a professional profile.

Career Opportunities

- You will be in a good position to demonstrate your potential to employers. Recruiters value the skills to work in a team, the ability to continue to learn, analytical abilities, and a broad understanding of management informed by contemporary research.
- Whatever you decide to do, the successful completion of your MBA should have laid a strong foundation for you to become a positive change agent in any organization and an obvious champion for the added value of a dynamic and innovative organizational culture. You will also have had extensive and continuous opportunities for reflective and critical evaluation of your capability as a team worker and leader.
- As part of a large and multicultural learning community, you should gain a valuable network of friends and contacts for the future. Our MBA Alumni organization will help you keep in touch with your MBA contacts.

MSc*

MSc Applied Computing and Information Technology with Project Management

Qualification

MSc

Awarding University

University of Bedfordshire (UoB), UK

Duration of Course

Full-time over 24 months

Entry Month(s)

6 Intakes per year
(October, November, February,
April, June, August)

**Proposed*

This course is designed for non-computing graduates who are looking to apply information technology to their current career, or who are looking to change their career direction. The course covers a wide range of topics including programming, databases, security, Project Management and computer networking. During the course you will learn the underpinning theory of these topics, and you will apply this theory in practical scenarios.

The main educational aims of this course are:

- ➔ To provide you with a critical understanding of Information Technology (e.g. programming, networking and databases) and how it can be applied to practical situations;
- ➔ To develop your analytical and evaluative skills with respect to information technology problems;
- ➔ To develop your problem solving skills with respect to IT-based solutions.
- ➔ To develop your understanding of the social and legal aspects of the Information Technology field.

Distinctive Features

- ➔ Demonstrate a deep and systematic knowledge of the key principles, tools and techniques used in the field of Applied Computing and Information Technology including current and emerging theoretical and methodological approaches.
- ➔ Design and undertake a substantial investigation to address significant areas of theory and/or practice in an area of Applied Computing and Information Technology and, selecting appropriate methodological processes and critically evaluating their effectiveness.
- ➔ Use an appropriate form of advanced problem solving along with creativity and innovation in order to develop an appropriate solution to complex real-world problems in unfamiliar contexts that require the application of computing and information technology.
- ➔ Apply, develop and evaluate tools, methodologies and techniques consistent with current research and /or professional practice at the forefront of the field of applied computing and information technology.

Career Opportunities

The critical, theoretical, analytical, and practical skills of this degree will prepare you for a range of careers.

- You could progress to a career in management, supervision, database/IT development or system design/analysis. Specific roles might be IT consultant; IT manager; systems developer; and programming supervisor. Other careers include IT managers or practitioners within commerce; database and IT developers; or system designers/analysts.
- The course prepares you to work within industries that make substantial use of computers and IT as well as professional roles in companies where computers and IT take on a more support function.
- As a graduate of this course, you will also have the opportunity for further study at MPhil or PhD level.

MSc Course Structure

- Student Admission Prediction
- Web Application to improve Traffic management
- News Scraping and Classification using Artificial Intelligence

LIVING IN KATHMANDU

Our Campus in a Beautiful City

We are delighted that you will be studying a programme with us during this academic year. From the day you arrive to the day you graduate, we will help you feel welcome and fully supported. We will even help you plan your career move.

Living in Kathmandu

PCPS is based in Lalitpur away from the maddening crowd. It is located very close to the airport (approx. 20 minutes away) by a taxi.

Kathmandu has been the center of Nepal's history, art, culture and economy. It has a multi-ethnic population within a Hindu and Buddhist majority. Religious and cultural festivities form a major part of the lives of people residing in Kathmandu. Tourism is an important part of the economy as the city is the gateway to the Nepalese Himalayas.

Accommodation on arrival

If you arrive unannounced or out of hours you may be required to organise your own accommodation.

Temporary accommodation in the college is very limited.

If you arrive in PCPS without accommodation you might have to stay in a hotel. Hotels in the Kathmandu are expensive (upwards of NRs 3000 a night), so we strongly recommend you book accommodation in advance.

Entertainment and Nightlife

Kathmandu is regarded as one of the safest place in Nepal. Kathmandu boasts the finest of clubs, restaurants and malls in the entire country. The nightlife in Kathmandu is rocking with world known casinos and famous clubs, pubs and movie theaters. There are hundreds of restaurants, bars, clubs and dance bars. Most of the bars, restaurants, and pubs close before midnight. But, some clubs and bars are opening till late.

- Jal binayak temple : 5.1 Km
- Karyabinayak : 6.9 Km
- Suryabinayak temple : 14.3 Km
- Jamal Mosque : 3.6 Km

Summer Vacation

What do you have planned on your bucket list for the summer after your terminal exam? You may locate various locations that are close to Kathmandu if you enjoy traveling and hiking, and they include:

- Mount Everest View Trek : 200-300 Km
- The Annapurna Circuit : 168 Km
- Pokhara : 200.6 Km
- Lumbini : 250 Km
- Chitwan National Park : 169.8 Km

Climate of Kathmandu

Kathmandu has the world's best weather, where you can easily adapt to any type of weather and enjoy it. The hottest month of the year in Kathmandu is June, with an average high of 83°F and low of 68°F. In January, Kathmandu has the coldest weather, with an average low of 38°F and high of 65°F.

Night Life

In Kathmandu

If you are an international student who is unsure whether Kathmandu is safe for nightlife, we urge you to be fearless and experience the nightlife that you desire.

Kathmandu, Nepal's main city, is a buzzing city that rarely sleeps at night. It offers fantastic historic sites even at night where you can enjoy music, cuisine, beverages, and a dance floor all in one location. Apart from this, it is a great spot to hang out with friends, socialize and meet new people. If you are curious about exploring Nepalese cultures, and traditions and understanding the traits of the local people, you should once go for a night out with your friends.

For this, you can visit the place called Thamel, the most happening and popular tourists destinations in Kathmandu. Similarly, another lively place to visit at night is Durbarmarg. It is occupied with fancy shops, nightclubs, restaurants, hotels, and so on. In this place, you will see both Nepalese and foreigners hanging out. Wherever, you go and in each place you stepped, you will receive a warm welcome and hospitality.

Feel free to walk in every alley of Kathmandu city!

International Students

Mansi Bohra
BBA, 2021-2022
(India)

I had a wonderful and unforgettable time at PCPS. My interpersonal and academic skills were improved at PCPS. I had the chance to interact with a variety of international students and learn a lot from them. My first year at PCPS has been a tremendous learning experience with lots of outside exposure. I have been successful in developing my leadership, time management, and teamwork skills, and I have also been successful in taking these skills to the next level for my upcoming years.

What is most notable about PCPS is that it has some of the best infrastructure in the Patan area. The college's cross-cultural interactions among students from different cultures are its strongest feature. The college is what it is now because of the professors here. They not only help in the classroom, but they also lay the groundwork for what students learn at this prestigious school, which is an invaluable asset.

Rose Agrawal
B.A (Hons.)
in Business
Administration
(India)

I've developed deep relationships with my classmates, and the faculty members' patience and politeness make me feel welcome. However, it is situated in a peaceful, and cultural area. As a business student, I was exposed to a learning environment that met the highest standards of instruction around the world. Aside from this, I acquired a totally new way of life in addition to a superb education. I hope that the lessons I've learned and the advice I've received from knowledgeable professors have equipped me with the skills I need to build a successful future for myself.

Mohan Siwakoti
(Bhutan)

Being an international student in a foreign country and experiencing a foreign atmosphere might be difficult. Most individuals find it challenging to meet new people, experience other cultures, and adjust to a new way of life, but with the support of the friends and teachers I've met in PCPS, it has been a breeze.

The first day I walked into PCPS, I was a little anxious and excited at the same time. I was curious to know how memorable my academic life was going to be. However, I was nervous about meeting new people and coping with the new environment. As time passed by, I realized I was happy and proud to be a PCPSian. All the people around here are humble and caring. The best thing about the college is that it is student centric. In the beginning, I might not have been that confident, but now I can assure you that it is the best place to be.

Ritik Sharma

B.Sc. (Hons)

**in Computer Science & Software Engineering
(India)**

It was a mixed bag of emotions when I remembered my first day at PCPS College. I was both excited and nervous about embarking on a new chapter in my life, but I was also overwhelmed by the new surroundings and responsibilities that come with being a college student. But, as I entered the PCPS college grounds, I felt a sense of accomplishment for having made it to college, as well as hope for the opportunities and experiences that lay ahead.

Mayank Agrawal

B.Sc. (Hons)

**in Computer Science &
Software Engineering
(India)**

I have felt like I have accomplished so much in a short period of time ever since the first week of class. I've acquired artistic and technical skills that will broaden my options for future opportunities. Through educated specialists, I have improved my interpersonal skills and confidence. PCPS College is the best option for students looking for a friendly, accessible, and inclusive university.

Rajnee Basnet

(Bhutan)

Undertaking your studies abroad creates a completely new chapter in your life. It is not an easy decision to make because there are many issues to consider regarding the environment, culture, people, and, most importantly, the faculty members themselves.

The faculty have been kind and empathetic toward me. Our voices are heard, and the teachers endeavor to work with students to find solutions.

Kanhaiya Sharma

**BSC CS&SE
(India)**

I am thoroughly enjoying my course and the learning opportunities it provides. The curriculum is well-structured and covers a wide range of topics, including programming languages, computer networks, data structures and algorithms, databases, and software engineering. The professors are highly knowledgeable and experienced, and they are always willing to help and support us in our studies. I would strongly recommend it to anyone interested in pursuing a career in the field of IT and computer science at PCPS College.
